

ENVIRONMENTAL POLICY

BLAUNAVAL MARINE OIL & FUEL CARE Division is committed to respect the Environment and follows a through strategy of sustainability, and it is part of our drive to carry out our activity minimizing the impact on nature and the environment.

To reinforce this commitment we have adopted an Environmental Management system under the UNE EN-ISO 14001:2015 standard and we develop our Environmental Policy in accordance with the following principles:

- Work in a respectful manner with the environment, ensuring its protection and preventing pollution.
- Integration of environmental and sustainability criteria into management and operational processes, in order to converge on the demands of our society, which is increasingly aware of environmental protection.
- Guarantee compliance with applicable environmental regulations, the environmental requirements of our clients and those voluntarily assumed.
- Correct management of the waste we generate in our operations.
- Rational use of natural resources and energy, minimizing waste and residue, emissions into the air and discharges into water.

- Promote the training and awareness of the people in our organization and collaborators in accordance with the principles of environmental responsibility.
- Continuous improvement of environmental performance, incorporating the best possible practices and technologies to reduce the environmental impacts of our activity.

We trust that everyone, management and operational staff, and our collaborators will accompany us in the personal commitment to caring for the environment as a responsible way of life.

The Management is committed to providing the necessary resources to achieve environmental objectives and to periodically monitor the results of the application of this Environmental Policy.
